Roman Mykhailovych

Senior Software Engineer & Software Architect (.NET)

Lviv Region, Ukraine

rmyhaylovych@msn.com | LinkedIn | GitHub

Summary

Expert Software Engineer and Architect with 15+ years building robust, scalable, mission-critical systems on the .NET stack. Deep hands-on background in ERP and resource accounting, logistics and supply-chain / procurement, real-time data synchronization across disconnected clients, role-based workflow systems, and monitoring / alerting. Owns architecture end to end - from documented decisions (C4, ADR, fitness functions, FR/NFR) to backend, data design, and operator-facing desktop clients. Currently working on enterprise solutions incorporating applied AI (LLMs, RAG, Agentic AI) for decision support and automation. Comfortable across cloud (Azure, AWS) and on-premise / restricted-network deployments. **Seeking opportunities to apply my software engineering and architecture expertise in the deftech industry.**

Focus areas

ERP, supply chain & resource accounting - 8+ years building ERP platforms with integrated inventory, procurement, and logistics.

Disconnected-first sync & real-time state - Synchronization layers and offline-capable clients; real-time multi-user collaboration and live event / notification flows.

Logistics & operations platforms - Yard / shipment management, work-order dispatch, fleet / lead management, completion-metrics dashboards.

Role-based, workflow-driven systems - Multi-role access, configurable wizards, process splitting across users.

Monitoring & alerting - Status aggregation and time-sensitive notifications across distributed client environments.

Architecture ownership - Translating hard NFRs (reliability, scale, security) into documented, defensible designs.

Applied AI for decision support - LLM / RAG / Agentic pipelines for analysis, document processing, and back-office automation.

Skills

.NET / ASP.NET Core · Software Architecture · C4, ADR, Fitness Functions · Azure / AWS / On-Prem · ERP & Supply Chain Systems · Real-Time Sync · Agentic AI / RAG · TypeScript / Angular · PostgreSQL / MongoDB / Qdrant · WPF / Windows Forms · System Design · DDD / TDD

Experience

Senior Software Engineer / Software Architect

Rocket Harbor | Lviv Region, Ukraine | Dec 2017 - Present

- Architect and lead engineer for a portfolio of enterprise ERP, logistics, and supply-chain platforms, owning system design, data models, and architecture decisions (C4, ADR, fitness functions) end to end.
- CubeMonk - ERP with integrated logistics and supply management (inventory, procurement, order / shipment tracking, resource accounting).
- Cerve - ERP + logistics platform.
- Cend - ERP + supplies / procurement platform.
- Tektiles - ERP for MSP (managed service provider) operations: asset, vendor, and service management.
- MSP Customer Agent - designed and built an Agentic AI assistant on Microsoft Foundry (LLM / RAG / Agentic AI, Semantic Kernel, MCP) automating customer support and decision workflows.

ASP.NET Core · ABP · Azure · PostgreSQL · Qdrant · Angular · TypeScript

Software Engineer

Neadevis | Lviv, Ukraine | Mar 2016 - Aug 2017

- Built a real-time collaborative editing platform letting multiple users edit web documents simultaneously - concurrency control, conflict resolution, live sync.
- Delivered Backup Radar, a backup-monitoring and alerting product - status aggregation and notifications across many client environments.

.NET Developer

Artelogic | Lviv, Ukraine | Mar 2013 - Mar 2016

- Vehicle Inspection Management System - owned architecture and database design; built the backend and offline-capable mobile clients (Android / iOS / Windows 8) with a synchronization layer for disconnected operation; role-based access and configurable wizard workflows.
- Web Synapse (Yard Manager) - real-time yard / shipment logistics management with event tracking and notifications for time-sensitive shipments.
- Titan SolvOne (Work Order Manager) - centralized facility operations dashboard: vendor / technician management, dispatch tracking, completion metrics, invoicing.
- InkProPlus / Mover Technologies - scalable business- and lead-management platforms; owned architecture and DB design.

.NET Web Developer

Freelance | Jan 2017 - Dec 2018

- Freelance .NET web development, in parallel with the full-time role at Rocket Harbor.

.NET Developer

Abto Software | Dec 2011 - Aug 2012

- MS Dynamics CRM solutions.

.NET Developer

ViSoft GmbH | Jul 2011 - Dec 2011

- Silverlight applications.

.NET Developer

Edvantis | Apr 2010 - Jul 2011

- ASP.NET web development.

.NET Developer

DMD Ukraine | Dec 2007 - Jan 2010

- WinForms desktop apps and web services.

Technical skills

Architecture
Multi-tiered · Clean Architecture · Modular Monolith · Service-based · C4 · UML · Architecture-as-Code · FR/NFR · ASR/ADR · Fitness Functions · draw.io · Lucid · Miro

Backend (.NET)
ASP.NET Core · Web API · MVC · Entity Framework · ASP.NET Zero / ABP · WCF · Web Forms (legacy)

Messaging & Caching
Kafka · RabbitMQ · Redis · Hangfire

Desktop / Operator UI
WPF · Windows Forms

Data & Storage
MS SQL Server · PostgreSQL · MongoDB · Cassandra · MySQL · SQLite · Qdrant (vector)

Applied AI / ML
GenAI · LLMs · Agentic AI · ML · RAG · Agentic RAG · MCP · Semantic Kernel · Microsoft Agents Framework

Cloud & On-Prem
Azure Functions · Azure Service Bus · Cosmos DB · Table Storage · Bot Framework · Azure AI Search · Azure AI Foundry · AWS Lambda · AWS S3 · On-premise / restricted-network

Frontend
TypeScript · JavaScript · Angular · AngularJS · jQuery · HTML/CSS/LESS

Tooling
Visual Studio · VS Code · Cursor · GitHub Copilot · Claude Code

Education

Bachelor's Degree - Ivan Franko National University of Lviv (2005)

Languages

Ukrainian - Native · English - B2
